

## HULTAFORS SPIRIT LEVELS GET NEW DESIGN AND NEW FEATURES ON THE PV SPIRIT LEVEL

Hultafors spirit levels are updated with a new tough and modern design enhancing the impression and increasing the opportunity to find the products in the shops. We are confident that the new design will give both increased attention and increased sales. At the same time the PV Spirit Level get two new features, a focus vial for easier reading and end caps with a unique anti-slide function. All models retain the current ref.no. number but two lengths of the HV model will be deleted from the range. Transition to the new design is continuous starting from week 40, and from week 45 only new design will be distributed.

## PV SPIRIT LEVEL WITH FOCUS VIAL AND ANTI-SLIP FUNCTION

### PV SPIRIT LEVEL ALUMINIUM

Extra strong aluminium profile measuring 59x26 mm and weighing 880 g/m. Transparent and durable Crush-proof block vials with temperature-proof vial mountings, highly resistant to ultraviolet light and temperature fluctuations. Horizontal vial with +30% magnification lens and luminescent reflector.

- Tolerance in normal position is  $\pm 0.5$  mm/m, upside down  $\pm 0.5$  mm/m.
- Focus vials with colour markings for easy reading and with a 200 mm radius giving a sensitivity of 10 mm/m.
- Shock absorbing end protectors with anti-slip function.
- The liquid in the focus vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement.
- The anti-static properties of the liquid means that the bubble is not affected by static electricity.

Ref.no.	Model	Length (mm)	Vials	Qty/pack
414001	PV 40	400 mm	3 st	1 st
414101	PV 60	600 mm	3 st	1 st
414201	PV 80	800 mm	3 st	1 st
414301	PV 100	1000 mm	3 st	1 st
414401	PV 120	1200 mm	3 st	1 st
414501	PV 140	1400 mm	3 st	1 st
414701	PV 200	2000 mm	3 st	1 st

### HV SPIRIT LEVEL ALUMINIUM

Strong, easy to hold aluminium profile measuring 51.5x25.3 mm and weighing 630 g/m. Crush-proof block vials that are highly transparent and durable. Horizontal vial with a +30% magnification lens and luminescent reflector. Shock absorbing end protectors and temperature-proof vial mountings.

- Tolerance in normal position is  $\pm 0.5$  mm/m, upside down  $\pm 0.75$  mm/m.
- The radius of the vial is 200 mm, giving a sensitivity of 10 mm/m.
- The liquid in the focus vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement.
- Highly resistant to ultraviolet light and temperature fluctuations.
- The anti-static properties of the liquid means that the bubble is not affected by static electricity.
